STRICTLY OBSERVE THE FOLLOWING GUIDELINES IN ORDER TO USE THE PRODUCT PROPERLY AND AVOID POTENTIALLY DANGEROUS ACCIDENTS.

PROCEDURE

STEP 1 Read and understand all steps in the instructions before starting the installation. Park the motorcycle on a hard, level surface and turn off the ignition.

STEP 2 Remove the two screws that secure the lens as shown in PIC.1; they will be used again.

STEP 3 Replace the stock bulb with an amber bulb (red for the rear signal if using a run-turn-brake controller.)

STEP 4 Install the new lens and secure with the screws that were removed in STEP 2, being careful not to over tighten them.

NOTE If the screw does not fit freely through the lens, it may be necessary to thread the screw through the lens, ensuring that it turns freely before installing the lens.

STEP 5 Repeat STEP 2 through STEP 4 for the other side.
